FINANCE DOCKET NO. 30400

---

MEMORANDUM OF DISCUSSIONS AND AGREEMENTS  
AS TO DISCOVERY ISSUES  
AMONG ATSF (WILSON), SP (SMITH), M-K-T (KHARASCH),  
JUNE 22, 1984

---

The parties had before them Kharasch's letter of June 19, 1984 discussing discovery disputes, the M-K-T Requests of April 23, 1984 (MKT-2) and June 4, 1984 (MKT-4), and the applicants' responses to date. Wilson and Kharasch first discussed applicants' rail traffic diversion study, and then Smith, Wilson and Kharasch discussed all other discovery matters.

I. APPLICANTS' DIVERSION STUDY

First, Messrs. Wilson (SF) and Kharasch (M-K-T) discussed responses to M-K-T requests Nos. 4-9, (dealing with the Applicants' computer diversion study), under five topic headings.

A. "Statement of Procedures"

Kharasch requested a detailed "Statement of Procedures," stating step-by-step the procedure used, the data sources, assumptions, stating the actual figures used, deri-

vation of figures, actual formulae used, exclusions (i.e., points when no diversion calculations was made), and so on, with identification of any documents containing listings, figures, formulae.

Wilson agreed to produce such a statement, with a tentative date of July 3.

It was agreed that further discovery will continue after the "Statement of Procedures" is available, if M-K-T has remaining questions.

B. Identification of Documents

Kharasch requested a full, detailed, index of papers in the depository, with an indication which papers were responsive to which requests. Wilson felt this would be an unfair burden, but agreed to do further labeling of depository papers.

Agreed to hold this question until the Statement of Procedures is available and the depository documents can be reviewed in the light of the statement.

C. Production of All Documents Discussing, Describing, Referring to, etc.

Kharasch pointed out that a number of applicants' answers to questions say "all documents used in preparing the application" are in the depositories without stating that all documents called for are in the depository (such as, e.g., a letter saying "use another procedure"). Wilson stated (as to the diversion study) that all documents are deposited.

D. Specific Questions

Kharasch asked a number of specific questions about the study procedures (such as calculations of "impedances"). Wilson responded orally to these questions. [Note: such questions may be answered in the Statement of Procedures; if not, Kharasch will submit the questions as supplementary discovery, and SF can confirm the answer as given orally.]

E. Costs of Producing Data

Kharasch raised the question of responsibility for costs of producing and copying data in connection with the DNS bill for \$9000 to the M-K-T for providing tapes (Invoice DNS 240-2, 6/15/84, copy attached) Kharasch stated he believed the proper allocation of costs was:

1. M-K-T should pay for:
  - (a) Cost of blank tapes
  - (b) Copy costs for tapes
  - (c) Mailing/express charges
  - (d) Costs of creating any special programs and computer runs required to respond to M-K-T requests other than requests for data used in the applicants studies.

Thus M-K-T has agreed to pay (i) \$1300 for selected "impedance" reports and (ii) \$2500 for running applicants' diversion study traffic tapes to separate out traffic in which M-K-T participated.

2. Kharasch stated M-K-T should not pay for costs of preparation of data actually used in the applicants'

studies, such as "base case," "adjusted base case," "post merger." Wilson said that the base case, adjusted base case, post merger tapes had had to be created to respond to protesters' requests. That is, the cost of producing data separating out traffic in which M-K-T participated would be about \$11,500 if the preliminary step had not been done. Kharasch responded that if the data were used it was the applicants' responsibility to provide data in copy-able form.

No resolution was reached and it was agreed to present the question to Judge Hopkins for decision at the June 27, 1984 discovery pre-hearing.

## II. OTHER DISCOVERY MATTERS IN ISSUE

Messrs. Smith (SP), Wilson and Kharasch then discussed all other discovery matters in issue, under various topic headings as follows.

### A. Requests #39, 40, 41 (June 4 Supplementary Requests)

These requests were filed June 4, 1984, responses had not been received, and Kharasch requested applicants' position, with the following results:

#39. Will be answered; The SF-SP contract will be supplied and other documents supplied subject to a protective order restricting access to named persons and giving notice of proposed use in the case.

#40-41. ("Tying" contracts for grain)

1. SP has no such contracts.
2. SF will have to review with SF officials and then supply or object. (As to these questions, Kharasch offered to restrict access to answers to outside counsel, with notice of proposed use).

Thus, SF answers to M-K-T #40, #41 may require Judge Hopkins' rulings on June 27.

B. Refusals To Answer

1. SP refusals to answer M-K-T requests #31-#37 (Re SP route closings).

#31. (SP lumber, grain carriage 1982, 1983, 1984 to date)

Smith pointed out that M-K-T has a 10% sample of all 1982 SP traffic, and can determine lumber and grain traffic. Kharasch said the 1982 data may not show actual circuitous routings, and 1983, 1984 are not available. After discussion, agreed to await responses to M-K-T #32, which may contain summaries or reports of lumber and grain movements; if they do not, M-K-T may renew request for specific traffic figures (i.e., issue postponed until answer to #32 received).

#32. (SP lumber, grain route closing policies and reports.) A search will be made for lumber and grain to OK, KS, TX, Mexico, studies, analyses, reports, policies, plans, which will be produced

(subject always to existence of documents and appropriate protective order).

#33. (SP route closing policies generally.) After much discussion, agreed that (subject to appropriate protective order and existence of documents) SP will produce documents as to general SP route closing policies and plans applicable to KS, OK, TX, Mexico, traffic, including (i) Chlorine Institute case (ICC #39176) documents produced and (ii) a search for other documents called for here but not in #39176 papers.

#34. (SP Gateway Analysis, etc.) Subject to same comments as #33, documents will be produced if different from #33 responses.

#35. (SP policies re M-K-T requests for routes.) Smith said that, particularly as to #35(d), SP management felt SP internal cost calculation methods are highly confidential and sensitive.

(1) After much discussion, production agreed as to 35(a), (b), (c) (subject to same restrictions as above).

(2) As to #35(d) SP will determine and respond whether such revenue/cost calculations were made. After reviewing answers to 35(a), (b),

(c) M-K-T may move for further responses to #35(d) if calculations exist.

(3) Answers to 35(c) will be limited to inspection by outside counsel and independent experts.

#36. (SP/Heinrich policies for responding to M-K-T requests.) Subject to same comments as #32, #36 will be answered.

#37. (SP responses to specific M-K-T route requests.) Same treatment as answer to #35(d) - i.e., SP will determine if studies, analyses and reports were made and so indicate; M-K-T may then move for further response if documents exist.

## 2. Other Refusals

#14(a), (b). (SF-SP discussions, agreements.) After discussion, Kharasch agreed to restrict 14(a), (b) to new SF-SP agreements and discussions after September 1, 1983 (the date Smith/Wilson stated present merger discussions began) to date. Production agreed. Noted that answer to this request would include answer to #39.

#17. (Applicants' studies, etc. of traffic in areas covered by M-K-T trackage rights.) Kharasch explained relevancy, whether or not the studies, etc. were used in preparing the application. Smith/Wilson said only 1982, 1983 were study years;

Kharasch agreed to delete 1984. Production agreed, to be subject to appropriate protective order.

After discussion of degree of detail sought Kharasch stated individual waybills not wanted, but rather reports, studies, analyses.

Smith/Wilson agreed to conduct search and produce (sensitivity of cost calculations again noted).

#18. (SF, SP studies of post-merger carriage.) Wilson/Smith stated there were no such studies - the companies just merged. Exception: as to #18(b), diversion study papers are in depository.

#19. (SF-SP discussions 1/1/83 - date.) Noted that #19(c) is covered by #14(a), (b) and #39.

#24. (Applicants' joint facility agreements, etc.)

Kharasch agreed to strike joint rate request, and to limit request to OK, KS, TX. SP has put a print-out of agreements in its depository. Wilson agreed to provide SF list of agreements in OK, KS, TX. M-K-T will then designate specific SP or SF agreements, which will be produced.

#38. (SF-SP competition.) Wilson/Smith agreed SF and SP will look for policies, plans, studies, reports on SF-SP competition, which will be produced if they exist.

C. Identification of Papers, Etc.

M-K-T #5, #30. Smith said all papers called for are in depository whether or not "used in preparing" application.

#20. Smith pointed out proprietary computer programs will be made available only subject to protective order such as agreed to by KCS, D&RGW.

#25-30. Kharasch requested specific identification of responsive documents. Smith said indexing in depository is sufficient to identify. SP has, and will provide, a specific response to #26 (Southwest KS study) identifying documents (specific protective order re #26(d) (Reebie/TRANSSEARCH) is required). After review, Kharasch may have to apply for further identification.

E. Possible Confusion

#22, #23. (Tex-Mex discussions.) Discussed, and clarified by Kharasch. Neither SF nor SP has such documents.

F. Costs of Producing Data

Same discussion as to costs as Wilson/Kharasch discussion above (part I. E.). The matter will need to be presented to Judge Hopkins on June 27.

CONCLUSION

Subject to: (1) SF agreement to #40, #41, (2) M-K-T renewal of requests or further questions after production as

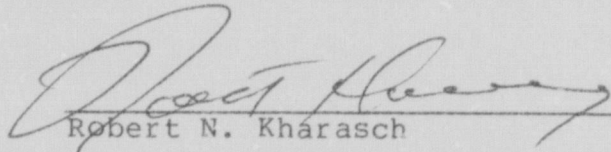

oted above, the parties were in agreement as to present production (to be subject to appropriate protective orders as noted, and existence of documents).

Judge Hopkins will be asked to rule on June 27 as to:

- (a) payment of costs for producing data;
- (b) #40, #41 if SF objects.

Also, the parties will raise for Judge Hopkins' consideration:

- (c) distribution of responses to all parties (see ICC Order No. 7); and
- (d) the poor state of the service list.

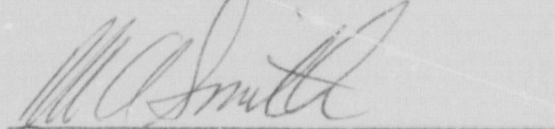

Robert N. Kharasch

Enclosed is the bill for the production of the discovery material you requested from Dennis Wilson regarding the Santa Fe - Southern Pacific Railroad traffic diversion study. This bill covers the production of the groups of computer tapes known as "Base Case", "Adjusted Base Case", "Post Merger", "ICC Waybill", and "ATSF Sample".

In order to fairly allocate the costs associated with producing similiar material for several requesting parties, we have accumulated all of the costs associated with producing the material and have allocated them to the material that was produced. Thus, for example, all parties requesting "Adjusted Base Case" equally shared the cost of producing that information.

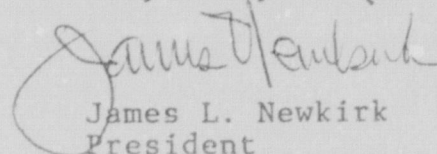

In the event that further requests for the same information are received, we will reallocate the initial production costs to include the new requesting party. In that event, you will receive a refund from us to reflect the amount that you would have been billed if all parties had made their requests at the same time. By this means, all parties will share proportionally in the initial cost of producing the material for discovery.

The cost elements are included in the total allocated amount are:

- Labor
- Computer
- Tapes
- Tape Copying by an Outside Service
- Computer Charges
- Federal Express

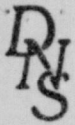

If you have any questions, please call me.

Very Truly Yours,

  
James L. Newkirk  
President

FINANCE DOCKETS NO. 30,400, ET AL.

SANTA FE SOUTHERN PACIFIC CORPORATION - CONTROL -  
SOUTHERN PACIFIC TRANSPORTATION COMPANY

JUNE , 1984

Upon consideration of an oral request, made at a prehearing conference on June 27, 1984, for a procedural order to establish guidelines relating to the use of document depositories in these proceedings, it is ordered:

Any party wishing to establish a document depository to facilitate the production of documents for discovery shall comply with the following requirements:

1. With respect to an application, or evidence, filed in these proceedings, the depository shall be completed, and opened for visits by parties seeking discovery, not more than 7 days after such filing, or in the case of an application which must be accepted by the Commission, not more than 7 days after such acceptance.

2. The depository shall not be deemed to have been completed and opened, as required in paragraph 1 above, until there shall have been filed with the Commission and served on the parties:

- (a) an index of all documents contained in the depository, in sufficient detail to permit identification of each document;
- (b) a detailed statement of the guidelines or other standards utilized to determine the range and character of documents contained in the depository, including, where applicable, guidelines or definitions furnished to consultants, witnesses, etc. as to the meaning of terms such as workpapers and source documents; and
- (c) a statement that the depository is complete.

3. In the event the party establishing the depository learns that one or more documents were mistakenly or improperly omitted from the depository, such document(s) shall promptly be deposited, and a corrected index promptly furnished to all

parties. Any party so requesting shall be furnished, without charge, a copy of such document(s).

4. All depositories heretofore established shall be brought into compliance with the terms of this order within 7 days following service hereof.

By the Commission, James E. Hopkins, Administrative Law Judge.

GRA-464-SP

cc: 464-BN

Mr. T. J. Fitzgerald:

As you know, there have been recent articles in the Journal of Commerce and Traffic World about the SP-BN Voluntary Coordinating Agreement (VCA). Enclosed is a copy of a BN information bulletin issued by their Forest Products Marketing Group. The primary purpose of the issue is the VCA agreement.

BN has been enough of a problem with their constant flow of ever lower rates. Now with the new VCA agreement, which does not contain any minimum revenue provisions, their pressure is being felt even more.

Included in recent VCA action have been the following:

1. Substantially lower TC rates from BN origins to SP Arizona and California points that will even adversely affect movement from SS-Kansas origins to SP destinations.
2. Publication of BN-SP grain rates to Rio Grande crossings lower than rates contained in contracts we have with the SP to the same crossings.
3. Even with lower published rates, BN suddenly began offering soybean contracts cents below published rates. Their offers included ¢ from Kansas City and ¢ from Lincoln-Omaha to El Paso via BN-Ft. Worth-SP (SP handles this traffic via Houston) The same rates were offered to Laredo via BN-Ft. Worth-SP-TX-MX.

They were attempting to secure 40,000 metric tons of soybeans for July and August, which failed as the UP reduced the BN quotes by cents (¢). The UP feel their rates must be at least ¢ lower due to the BN car pool contracts. All quotes were later expanded to to include all grains which forced us to do likewise, due to surplus equipment expected during that time.

4. A ninety day BN-SP contract to Beaumont has been signed by Continental Grain Company. The contract calls for a rate of cents from Enid, Amarillo, Plainview and Lubbock compared to published rates by BN, as well as Santa Fe, ranging from 88-91 cents per cwt.

We were not given an opportunity to meet this in the first instance, due to an unfortunate breakdown in internal communication at Continental Grain. Hopefully, this will not happen again. In order to eliminate trucking from our local origins to these terminals, we have published the rates and graded out much as we did when the OK&T attempted this last year. The BN responded by blanketing Western Oklahoma and most of West Texas with cents, cutting our rates.

- Continued -

8834 8000 Y

The BN's endless stream of lower published rates and constant flow of contracts, has been augmented with increasingly vocal comments that they were going to be the least cost carrier and intended to capture 40 percent of whatever market they served. In fact, in a recent meeting with J.S. Elliott and Rod Kober, BN's Dick Gleason stated their two major obstacles to accomplishing this on grain in the Southwest was Santa Fe and Union Equity.

It is indeed unfortunate that SP would agree to a two-year VCA agreement at this time, especially with the expected merger to be decided about the end of the year.

In any event, the BN is expected to be even more active with the VCA agreement and that with our current cost, will have a very serious affect on our net revenues in several areas, especially grain and grain products. Without question, the old adage of the BN being "Big Nothing" is not true while recent remarks by many that they are the "Green Monsters" is becoming a reality.

P. H. O'Brien

# BOARD FOOT NOTES

MAY 1985

Issue No. 5

## BN BEGINS SECOND VCA - SOUTHERN PACIFIC

On March 1, 1985 Burlington Northern and Southern Pacific Transportation Co. agreed on the general principles for establishment of a Voluntary Coordinating Agreement (VCA) between them on existing and potential traffic in certain marketing corridors.

The main objective of this agreement is to so intensify the efficient use of both companies' assets and resources in the specific market corridors covered by the agreement as to cause enhanced modal competition within each of these corridors. The broadest application of this objective is in the north-south corridor along the west coast between BN connections, origins and destinations in B.C., Idaho and Washington and SP connections, origins and destinations in Oregon, California, Nevada and Arizona, where virtually all commodities and products are open to VCA efforts.

Other VCA efforts involve grain and chemicals in the midwest and south, and do not affect BN forest products customers, with the exception of chemicals from SP points in Texas and Louisiana.

The main objective breaks down into the following specific marketing, operations and accounting goals:

- 1) To simplify and accelerate the process of joint through rate-making.
- 2) To promote "end-to-end" marketing opportunities by targeting key specific transportation markets, and by allocating market development responsibilities within each market corridor to each of the partners.
- 3) To improve the quality, efficiency and profitability of their interline operations by utilizing the combined resources of both partners in the most mutually beneficial ways, within the designated market corridors, in order to simulate the advantages of single-line service. These operating resources include the pooling of motive power, establishment of run-through train services, and balancing the cost and performance of inspections and maintenance.
- 4) To streamline and simplify many of the accounting procedures with respect to targeted market corridor traffic and operations.

Although the VCA agreement was signed March 1, implementation will be gradual as select management committees from both companies confer and develop specific support agreements in the areas of accounting, operations and car service.

I

F  
O  
R  
M  
A  
T  
I  
O  
N

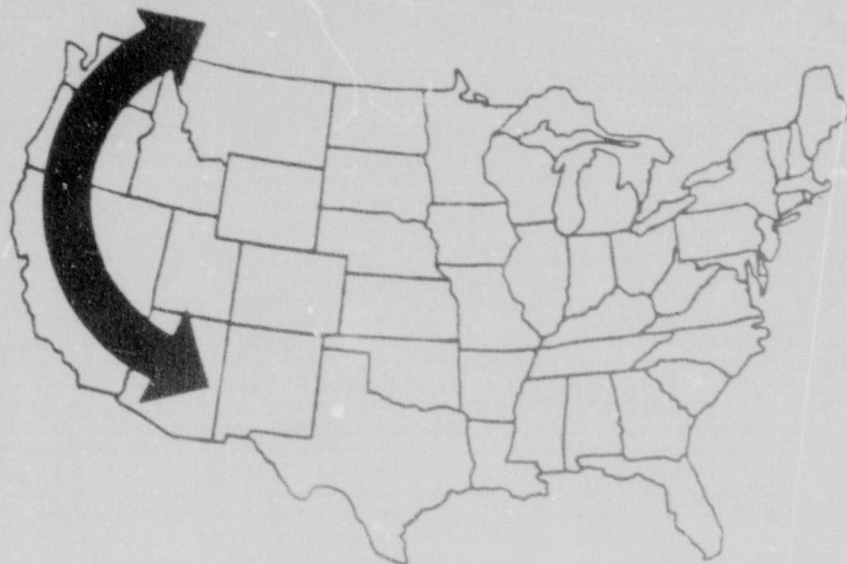

8834 8003

Probably the most important of these in its potential for overall cost reduction is the recently negotiated bi-lateral car use agreement concluded May 1, 1985. Its principle elements include:

- A) The original carrier has primary responsibility for its corridor car supply, and if unable to provide suitable cars, will seek assistance from its partner in this VCA ahead of other equipment sources.
- B) Specialized forest products boxcars, such as 60-foot or hi-cube 50-foot cars, will be returned within the corridor, loaded or empty, to their owner regardless of mechanical designation.
- C) Assigned boxcars and flatcars may be reloaded within the corridor on a case-by-case basis.
- D) Reduction in car hire will be featured in both directions as an incentive to reload inbound boxcars.
- E) Other than the above, unassigned boxcars and flatcars will continue to be handled per AAR Car Service Rules, with no special treatment within the corridor.

Both BN and SP managements are optimistic about the potential for streamlining and improving their joint marketing and operating efforts under this Voluntary Coordinating Agreement.

Project: DNS214 - Santa Fe Southern Pacific Merger  
1985 Study

Subject: Diversion and Non-Diversion Rules Used in Adjusted  
Base Case and Santa Fe Southern - Pacific Rail  
Traffic Diversion Studies

From: Bengt Mutén

Date: 12 July 1985

The DNS Associates, Inc. diversion model has four basic steps. Waybills are selected as candidates for diversion, candidate diverted routes are generated, candidate routes are accepted or rejected, and diversion percentages are assigned. The DVRT report shows a sub-sample of the moves selected as diversion candidates, along with each move's candidate diverted route and a reason code for the diversion or non-diversion. Also shown is the diversion percentage for each diverted move. The report also summarizes the number of records by the diversion reason code. In this report there is a one line description of the reason code. This memo explains in more detail the decision rules for accepting or rejecting a candidate diversion.

Diversion or non-diversion reason codes are assigned in one of the following five programs:

- DVRT - Diversion Candidate Route Program
- DVPCIP - Special Rules Program for Santa Fe - Southern Pacific Merger Iteration
- DVPC - Diversion Percentage Program
- EXRT - Special Rules Programs for Southern Pacific and Rio Grande trackage rights iterations
- DVRV - Divisions Program

The non-diversion reason code listed in the DVRT report is the first reason which rejected a movement as a possible diversion. Other reasons also may support the non-diversion designation. Included in this list is the diversion program in which each reason code is assigned.

## Rules Used in All Iterations Except Where Otherwise Indicated

### Diverted Traffic:

Reason Code 2 No reason for not diverting:  
Move was selected for diversion by DVOK and does not fit into any of the categories below. Assigned in DVRT.

Reason Code 19 Merging carrier overhead between class 7 roads:  
The merging carriers are overhead carriers, and the move originates and terminates on class I railroads. Assigned in DVPC.

Reason Code 52 Merging road overhead, class I road shorthauled:  
The merged system is overhead in the diverted route, and the originating carrier is a class I road with less mileage in the diverted route than in the pre-diversion route. Assigned in DVPC.

Reason Code 53 Merging road overhead, class I road shorthauled:  
The merged system is overhead in the diverted route, and the terminating carrier is a class I road with less mileage in the diverted route than in the pre-diversion route. Assigned in DVPC.

### Non-Diverted Traffic:

Reason Code 5 No merging carrier in diverted route:  
The candidate diverted route included none of the merging carriers. Assigned in DVPC.

Reason Code 9 Shorthaul to less than 20% of old route:  
The originating or terminating carrier is unchanged, is a class I carrier, is not a merging carrier, and the carrier's mileage in the diverted route is less than 20% of the carrier's mileage in the pre-diversion route. In all iterations, if the shorthauled carrier interchanges at Rotterdam Junction, NY, the move is still accepted for diversion. In all except the Santa Fe - Southern Pacific merger iteration, if the shorthauled carrier interchanged the move at a river gateway in the candidate diversion route, the move is still accepted for diversion. For Santa Fe - Southern Pacific merger iteration see rule 100 exception where the pre- and post-diversion interchanges are at river gateways. Assigned in DVPC.

Reason Code 10 Zero diversion percentage in matrix:  
The matrix specifies a zero diversion percentage for the move. This occurred only for auto traffic. Assigned in DVPC.

Reason Code 11 Diversion not in matrix:  
Pre-diversion to post-diversion changes in traffic class do not justify diversion. Assigned in DVPC.

Reason Code 12 Maximum circuitry exceeded:  
The diverted route mileage exceeds the mileage of the pre-diversion route by one of the following factors:

Expedited Traffic - 18%  
Auto Traffic - 18%  
Intermodal Traffic - 18%  
Other Traffic:

Diversion to a single line route - 50%  
Diversion to an interline route - 25%

Assigned in DVPC.

Reason Code 13 Merged system origin or on-junction and destination or off-junction are unchanged: The beginning and end of the merging carriers' route are not changed as a result of the diversion. Modified for Santa Fe - Southern Pacific merger iteration. Assigned in DVPC.

Reason Code 18 One merging carrier serves both ends in local move:

The diverted route is local to the merging carriers, and though more than one of the partners is in the diverted route, a single partner served both the origin and the destination prior to the merger. (This rule is the same as rule 107 and 108 in the Santa Fe - Southern Pacific merger iteration, but without the exceptions. The exceptions were used in the Santa Fe - Southern Pacific merger iteration where the merging carriers create a more competitive route than an individual carrier had prior to the merger). This rule is not a reason for rejection in the Southern Pacific or Rio Grande trackage rights iterations, nor in the Santa Fe - Southern Pacific merger iteration. Assigned in DVPC.

Reason Code 25 One merging road serves origin and off-junction: One of the merging partners served both the origin and off-junction in the diverted route. (This rule is the same as rule 107 and 108 in the Santa Fe - Southern Pacific merger iteration, but without the exceptions. The exceptions were used in the Santa Fe - Southern Pacific merger iteration where the merging carriers create a more competitive route than an individual carrier had prior to the merger). This rule is not a reason for rejection in the Southern Pacific or Rio Grande trackage rights iterations, nor in the Santa Fe - Southern Pacific merger iteration. Assigned in DVPC.

Reason Code 26 One merging road serves destination and on-junction:

One of the merging partners served both the on-junction and destination in the diverted route. (This rule is the same as rule 107 and 108 in the Santa Fe - Southern Pacific merger iteration, but without the exceptions. The exceptions were used in the Santa Fe - Southern Pacific merger iteration where the merging carriers create a more competitive route than an individual carrier had prior to the merger). This rule is not a reason for rejection in the Southern Pacific or Rio Grande trackage rights iterations, nor in the Santa Fe - Southern Pacific merger iteration. Assigned in DVPC.

Reason Code 27 One merging road serves on- and off-junctions:  
One of the merging partners served both the on-junction and off-junction in the diverted route. (This rule is the same as rule 107 and 108 in the Santa Fe - Southern Pacific merger iteration, but without the exceptions. The exceptions were used in the Santa Fe - Southern Pacific merger iteration where the merging carriers create a more competitive route than an individual carrier had prior to the merger). This rule is not a reason for rejection in the Southern Pacific or Rio Grande trackage rights iterations, nor in the Santa Fe - Southern Pacific merger iteration. Assigned in DVPC.

Reason Code 57 One merging carrier in new route, not in old route:

Only a single merging carrier is in the candidate diverted route, and that carrier was not in the pre-diversion route. This rule is modified in the Santa Fe - Southern Pacific merger iteration to permit diversion where the merged system originated or terminated the move at a SPLC or facility not served by the carrier in the diverted route, but served by the other merging carrier. Assigned in DVRT.

Reason Code 58 One merging carrier in new route, also in old route:

The merging carriers' portion of the candidate diverted route uses only one of the merging partners, and that carrier is also in the pre-diversion route. The rule is determined by checking the links and nodes used in the diverted route, without regard to whether that carrier serves the SPLC. Not a reason for rejecting a diversion in the Santa Fe - Southern Pacific merger iteration. Assigned in DVRT.

Reason Code 99 Loss of revenue using short-line miles divisions:  
The merging carrier revenue division is lower for the diverted route than for the pre-diversion route. Assigned in DVRV. See rule 84 for an exception to this rule allowed in the Santa Fe - Southern Pacific merger iteration.

# DNS

## Rules used in the Southern Pacific Trackage Rights study

A special rules program for Southern Pacific Trackage Rights, EXRT, is run after DVPC and before DVRV.

### Diverted Traffic:

Reason Code 125 Move forwarded by SP to NS at Kansas City pre-diversion, at East St. Louis post-diversion: Move is forwarded by Southern Pacific to Norfolk Southern at Kansas City, KS or Kansas City, MO in the pre-diversion route, and at East St. Louis in the post-diversion route. Diversion percentage is divided by three. Assigned in EXRT.

Reason Code 126 Move received by SP from NS at Kansas City pre-diversion, at East St. Louis post-diversion: Move is received by Southern Pacific from Norfolk Southern at Kansas City, KS or Kansas City, MO in the pre-diversion route, and at East St. Louis in the post-diversion route. Diversion percentage is divided by three. Assigned in EXRT.

### Non-Diverted Traffic:

Reason Code 105 Originates or terminates in San Diego: Move originated or terminated at San Diego, CA or San Ysidro, CA SPM station in the candidate diverted route. Assigned in EXRT.

Reason Code 111 SP interchange at East St. Louis or Ogden: Southern Pacific forwarded or received move at Ogden, UT or East St. Louis, IL in the pre-diversion route. Assigned in EXRT.

Rules used in the Rio Grande Trackage Rights study

A special rules program for Rio Grande Trackage Rights, EXRT, is run after DVPC and before DVRV.

Non-Diverted Traffic:

Reason Code 127 Move interchanged by SP at a designated junction in the pre-diversion route:

Pre-diversion move was forwarded or received by Southern Pacific at one of the following junctions:

- Baton Rouge, LA
- Corsicana, TX
- Dallas, TX
- Denison, TX
- Ft Worth, TX
- Greenville, TX
- Houston, TX
- Little Rock, AR
- Memphis, TN
- New Orleans, LA
- San Antonio, TX
- Sherman, TX
- Shreveport, LA
- Texarkana, TX
- Waco, TX

Assigned in EXRT.

# DNS

## Rules used in the Union Pacific - Missouri Pacific - Western Pacific merger study

### Non-Diverted Traffic:

Reason Code 12 Maximum circuitry exceeded:

The diverted route mileage exceeds the mileage of the pre-diversion route by one of the following factors:

Expedited Traffic - 18%

Auto Traffic - 18%

Intermodal Traffic:

Interchanged at Fremont, NE - 7.5%

All other - 18%

Other Traffic:

Diversion to a single line route - 50%

Diversion to an interline route - 25%

Assigned in DVPC.

Reason Code 128 O-D not subject to diversion:

Automotive, intermodal and expedited traffic between the following origin-destination pairs were not subject to diversion:

Chicago Heights, IL to Los Angeles, CA

Chicago, IL to Colton, CA

Chicago, IL to Denver, CO

Chicago, IL to Las Vegas, NV

Chicago, IL to Los Angeles Harbor, CA

Chicago, IL to Los Angeles, CA

Chicago, IL to Portland, OR

Chicago, IL to Seattle, WA

Chicago, IL to Tacoma, WA

Chicago, IL to Yakima, WA

Colton, CA to Chicago, IL

Denver, CO to Chicago, IL

Las Vegas, NV to Chicago, IL

Los Angeles Harbor, CA to Chicago, IL

Los Angeles, CA to Chicago Heights, IL

Los Angeles, CA to Chicago, IL

Los Angeles, CA to Streator, IL

Portland, OR to Chicago, IL

Seattle, WA to Chicago, IL

Streator, IL to Los Angeles, CA

Tacoma, WA to Chicago, IL

Yakima, WA to Chicago, IL

Assigned in DVPC.

# DNS

## Rules used in the Santa Fe - Southern Pacific merger study

The Santa Fe - Southern Pacific special rules are implemented in program DVPCIP, which is run after DVRT and before DVPC.

### Diverted Traffic:

Reason Code 84 Merging carriers lose revenue, diversion still allowed:

Merging carriers' division in diverted route is less than their division in the pre-diversion route. This is an exception to rule 99 where: (1) the pre-diversion ATSF off-junction was Chicago, IL, Streator, IL, Logansport, IN, or Farmdale, IL; (2) the post-diversion SFSP off-junction is East St. Louis, IL; and (3) the move terminated in Ontario, Michigan, Indiana, Ohio, Pennsylvania, Maryland, the District of Columbia, or points north and east thereof and move originated in Louisiana or Texas. Assigned by DVRV.

Reason Code 100 Shorthauled to less than 20%, pre- and post-diversion interchanges both at gateways:

Exception to rule 9 when a carrier receives or forwards the move at a gateway, the move is diverted to a different gateway, and a non-merging carrier's mileage in the diverted route is less than 20% of its mileage in the pre-diversion route. Assigned in DVPC.

### Non-Diverted Traffic:

Reason Code 13 Merged system's first and last SPM station unchanged, traffic class is unchanged:

The beginning and end of the merging carriers' route are not changed in the diversion, and the traffic class of the merging carriers' portion of the move is unchanged. Assigned in DVPC.

Reason Code 96 Merged system's first and last SPM station unchanged, non-class I railroad is eliminated:

The beginning and end node of the merging carriers' route are not changed in the diversion, but a non-class I railroad at either the origin, destination or both is eliminated. The internal route may be changed in rerouting, but this is not a diversion. The non-merging carriers' part of route might be different in the diverted route. Assigned in DVPC.

Reason Code 102 SP traffic originating or terminating in Nevada or Utah:

Origin carrier in pre-diversion route is Southern Pacific, and origin is in Nevada or Utah (i. e. on the Overland Route), or destination carrier in pre-diversion route is Southern Pacific, and destination is in Nevada or Utah. Assigned in DVPCIP.

Reason Code 106 Only merging carrier change is from CHGO to STRTR or KANCY to KCITY or vice versa:

The merging carriers origin or on-junction and destination or off-junction is unchanged in the diverted route except for a

003480014

substitution of Kansas City, MO for Kansas City, KS or vice versa, or a substitution among any of the following gateways: Chicago, IL, Streator, IL, Farmdale, IL or Logansport, IN. Assigned in DVPCIP.

Reason Code 107 Single merging carrier serves both endpoints, not covered by exceptions:

One or both of the merging carriers serves both ends of the merged system's portion of the diverted route. That merging partner was not in the pre-diversion route. Assigned in DVPCIP.

All moves that are exceptions from 107 will fit into reason codes 18, 19, 25, 26, 27, 52, 53 or 84 unless they are rejected as candidates for diversion by reason codes 9, 10, 11, 12, 13, 96, or 99 which are applied later in the process. The exceptions are as follows:

1 - Move originated or terminated in San Diego, CA.

2 - None of the merging carriers are in the pre-diversion route, only one of the merging carriers could carry the traffic via the merged system's portion of the diverted route, and the other merging carrier is shown in the Southern Pacific industry tape as switching either the shipper or consignee.

3 - None of the merging carriers are in the pre-diversion route, and the move is an intermodal move between designated city pairs. The diverted route is originated, terminated or interchanged at one of the following pairs of SPM stations in the direction shown:

- Dallas, TX to Oakland, CA
- Dallas, TX to Fresno, CA
- Dallas, TX to Stockton, CA
- Dallas, TX to San Francisco, CA
- New Orleans, LA to Oakland, CA
- New Orleans, LA to Fresno, CA
- New Orleans, LA to Stockton, CA
- New Orleans, LA to San Francisco, CA
- Dallas, TX to Los Angeles, CA
- New Orleans, LA to Los Angeles, CA
- Oakland, CA to Dallas, TX
- Fresno, CA to Dallas, TX
- Stockton, CA to Dallas, TX
- San Francisco, CA to Dallas, TX
- Oakland, CA to New Orleans, LA
- Fresno, CA to New Orleans, LA
- Stockton, CA to New Orleans, LA
- San Francisco, CA to New Orleans, LA
- Los Angeles, CA to Dallas, TX
- Los Angeles, CA to New Orleans, LA
- Memphis, TN to Los Angeles, CA
- Los Angeles, CA to Memphis, TN
- Los Angeles, CA to East St. Louis, IL
- East St. Louis, IL to Los Angeles, CA
- Houston, TX to San Francisco, CA

# DNS

Houston, TX to Oakland, CA

4 - The merging carrier in the pre-diversion route does not serve both end points in the diverted route, and instead interchanges the move at one of the following designated junctions:

Barstow, CA  
Stockton, CA  
Memphis, TN  
New Orleans, LA  
Snyder, TX  
Modesto, CA  
Avard, OK  
Sweetwater, TX  
Pueblo, CO  
Dallas, TX  
Denver, CO

# DNS

5 - Southern Pacific is in the pre-diversion route, and the move is interchanged at St. Louis or East St. Louis in the pre-diversion route.

6 - Either Santa Fe or Southern Pacific, but not both, were in the pre-diversion route, and the move was interchanged at Bieber, CA in the pre-diversion route.

7 - Either Santa Fe or Southern Pacific, but not both, were in the pre-diversion route, and the merging carriers' diverted route entered Kansas City on the Santa Fe and left on the Southern Pacific, or vice versa.

8 - (a) Both the merging carriers serve the origin of the move, (b) Santa Fe originates the pre-diversion route, (c) the move is interchanged at Kansas City in the pre-diversion route (not necessarily by the Santa Fe), (d) Southern Pacific serves the merging carrier endpoint in the post-diversion route (i. e. the destination or off-junction), and (e) Southern Pacific is not in the pre-diversion route.

9 - (a) Both the merging carriers serve the origin of the move, (b) Southern Pacific originates the pre-diversion route, (c) the move is interchanged at Kansas City in the pre-diversion route (not necessarily by the Southern Pacific), (d) Santa Fe serves the merging carrier endpoint in the post-diversion route (i. e. the destination or off-junction), and (e) Santa Fe is not in the pre-diversion route.

10 - (a) Both the merging carriers serve the destination of the move, (b) Santa Fe terminates the pre-diversion route, (c) the move is interchanged at Kansas City in the pre-diversion route (not necessarily by the Santa Fe), (d) Southern Pacific serves the merging carrier endpoint in the post-diversion route (i. e. the origin or on-junction), and (e) Southern Pacific is not in the pre-diversion route.

11 - (a) Both the merging carriers serve the destination of the move, (b) Southern Pacific terminates the pre-diversion route, (c) the move is interchanged at Kansas City in the pre-diversion route (not necessarily by the Southern Pacific), (d) Santa Fe serves the merging carrier endpoint in the post-diversion route (i. e. the origin or on-junction), and (e) Santa Fe is not in the pre-diversion route.

Reason Code 108 A merging carrier serves both endpoints, also in pre-diversion route:

A merging carrier serves both ends of the merged system's portion of the diverted route. That merging partner was in the pre-diversion route. Assigned in DVPCIP.

# DNS

All moves that are exceptions from 108 will fit into reason codes 18, 19, 25, 26, 27, 52, 53 or 84 unless they are rejected as candidates for diversion by reason codes 9, 10, 11, 12, 13, 96, or 99 which are applied later in the process. Exceptions are as follows:

1 - Move terminated on Southern Pacific in Louisiana or Texas; did not originate in Alabama, British Columbia, California, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oregon, South Carolina, Tennessee, Texas, Virginia or Washington or vice versa, and was interchanged in the pre-diversion route by Southern Pacific at:

- Dallas, TX
- Denver, CO
- Ft Worth, TX
- Beaumont, TX
- Denison, TX
- Shreveport, LA
- Alexandria, LA
- Texarkana, AR
- Sherman, TX
- Lake Charles, LA

2 - Pre-diversion move is interchanged between Denver & Rio Grande Western and Southern Pacific at Herington, KS.

Reason Code 129 Move originated in Nevada and terminated in WTL, Official, SFA or SWL territory, or vice versa:  
Waybill origin SPLC is in Nevada and destination is in Western Trunk Line, Official, Southern Freight Association, or South-Western Rate Territory, or vice versa.

Reason Code 130 Sabine River & Northern is in pre-diversion route:  
Pre-diversion route involved the Sabine River & Northern Railroad Company.

Reason Code 131 TOFC move between specified points, SP not in pre-diversion route:  
Intermodal move between Chicago SPM station and either Union City, CA, Milpitas, CA, San Jose, CA or San Jose Yard, CA SPM station, and Southern Pacific was not in the pre-diversion route.

Reason Code 132 Belton Railroad is in pre-diversion route:  
Pre-diversion route involved the Belton Railroad Company.

A "C" w/ the same 6 digit SPLC?

"O" K "E" same place?

SPLC / SPM problem fixed

Would the "O" be a TOFC load way billed from here?

000408175

Diverted Traffic

Reason Code 2	No reason for not diverting	22,240 Records
Reason Code 18	One merging carrier serves both ends in local move	8,559 Records
Reason Code 19	Merging carrier overhead between class I roads	2 Records
Reason Code 25	One merging road serves origin and off junction	4,893 Records
Reason Code 26	One merging road serves destination and on jet	6,163 Records
Reason Code 27	One merging road serves on and off junctions	183 Records
Reason Code 52	Merging road overhead, class I road shorthauled	140 Records
Reason Code 53	Merging road overhead, class I road shorthauled	305 Records
Reason Code 84	Merging carriers lose revenue, diversion still allowed	576 Records
Reason Code 100	Short-hauled to less than 20%, pre- and post-diversion interchanges both at gateways	113 Records

Non-Diverted Traffic

Reason Code 5	No merging carrier in diverted route	41,211 Records
Reason Code 9	Short-haul to less than 20% of c/c route	1,867 Records
Reason Code 10	Zero diversion percentage in matrix	395 Records
Reason Code 11	Diversion not in matrix	86 Records
Reason Code 12	Maximum circuitly exceeded	2,326 Records
Reason Code 13	Merging carrier route first and last SPM station unchanged, traffic class is unchanged	626 Records
Reason Code 26	Merging carrier route first and last SPM station unchanged, non-class I railroad eliminat	53 Records
Reason Code 99	Loss of revenue using short-line sales divisions	1,034 Records
Reason Code 102	SP Traffic originating or terminating in Nevada or Utah	2,017 Records
Reason Code 106	Only change from CHGO to STRTR or KANCY to KCITY or vice versa	2,323 Records
Reason Code 107	Single merging carrier serves both endpoints, not covered by exceptions	24,360 Records
Reason Code 108	Single merging carrier serves both endpoints, also in old route	64,670 Records
Reason Code 129	Move originates in Nevada and terminates in WTL, Official, SFA or SWL territory, or vice	716 Records
Reason Code 130	Sabine River & Northern is in pre-diversion route	310 Records
Reason Code 131	TCFC move between specified pairs, SP rot in pre-diversion route	110 Records
Reason Code 132	Benton Railroad is in pre-diversion route	24 Records

Re: SFSP Merger - F.D. 30400 - Discovery

Gentlemen:

While we have not yet had an opportunity to analyze in detail the statements in SFSP volumes 48-52 (nor, since extra copies did not arrive until today, any opportunity to have our consultants review the statements) a very rapid review shows that information on the following topics will be urgently needed as soon as possible, if the hearing is not to be much delayed:

- 1) Relative to REYFF Statement No. 2 in SFSP-49 (rail traffic diversion study revisited):
  - a) A complete, precise, and detailed statement of procedures used in the re-done computer diversion study. Note: All rules should be stated completely and in detail.
  - b) A detailed breakdown of the total figures given in Reyff's Table for diversions from M-K-T, showing at least diversions in dollars and type of commodity, byflows (origin-destination pairs).
  - c) All correspondence or memoranda of discussion between or among Reyff, other SF, SP personnel, DNS, concerning or mentioning (i) criticisms of DNS' first study or (ii) what should be done or tried in "rebuttal" or (iii) results of test

runs or samples (including test runs, samples, studies not used), or (iv) what appears in Reyff's statement or Tables.

- d) Complete, precise and detailed statement of what "runs" and "tests" were made.
- 2) Relative to Reyff Statement No. 1 (Klem-type computer study):
    - a) Complete, precise and detailed statement of procedures, stating all rules in detail.
    - b) All correspondence or memoranda among Reyff, other SF, SP personnel, others, concerning or mentioning Klem study or the Reyff No. 1 study, results of test runs or samples, what appears in Reyff's Statement or Tables.
    - c) Complete, detailed, precise statement of what tests, runs or samples were made.
  - 3) Relative to WECKER, SFSP-48
    - a) Complete, precise and detailed statement of procedures.
    - b) All correspondence or memoranda of discussions among Wecker, SF or SP personnel, others, concerning or mentioning the Wecker study, what to study, how to study, test runs or samples (including tests, samples or studies rejected or not used), what appears (or does not appear) in Wecker's statement and Tables.
  - 4) Produce the third volume in the series starting with SFSP-19 and SFSP-20 (the volume which shows SFSP participation in flows after merger (based on SFSP diversion computations). The testimony was that this had been created but was not filed in first SFSP round. Produce any writing referring to this volume, its use or non-use.

We will follow this with more formal requests as soon as our consultants and client have copies of the statements and can look at work papers.

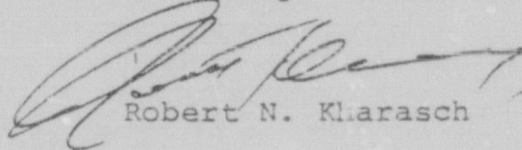

G. Paul Moates and Terence M. Hynes  
July 12, 1985  
Page Three

As to work papers, we have asked you to provide Reyff and Wecker work papers for inspection in Washington.

Please let me know as soon as possible if any of these requests will not be complied with.

Finally, as noted in our phone conversation, these requests do not waive the right to move to exclude Reyff 1 or 2 or Wecker as improper rebuttal - quite the contrary.

Sincerely,

Robert N. Klarasch

Re: Santa Fe Southern Pacific Corp.--Control--Southern  
Pacific Transportation Co., Finance Docket No. 30400

Dear Bob:

Ron Flagg forwarded to me your letter to Paul Moates requesting expedited responses to certain discovery requests. This letter responds to your first, second and fourth requests.

1. (a) Mr. Reyff's Verified Statement describing Applicants' rebuttal rail traffic diversion study is a complete, precise and detailed statement of the procedures used in that study. The implication in your question that Mr. Reyff's testimony does not meet the underlined criteria is completely inaccurate.

All rules used in the study are included in the study's workpapers which I understand your consultant, Mr. Anderson, will be inspecting on Thursday. Diversion percentage rules are set forth in the matrices used in the study (RTD R 161,162) and diversion and non diversion rules are set forth in a memorandum prepared by Bengt Muten of DNS Associates (RTD R 163). I will direct Mr. Anderson's attention to those reports during his visit here Thursday.

(b) Applicants do not have a "breakdown" of MKT diversions for any of the study iterations on either a commodity or a flow basis. Such a breakdown could be developed either through DNS Associates or by using the traffic data tapes used in the study (which will be supplied by DNS Associates at your request).

(c) All information responsive to each of the items mentioned herein are included in Mr. Reyff's workpapers. Again, I will direct Mr. Anderson's attention to those workpapers responsive to the first three listed subjects (apparently the fourth subject refers to all of the workpapers).

(d) This information is clearly set forth in Mr. Reyff's statement and workpapers.

0034 0080

2. (a) Mr. Reyff's Verified Statement in rebuttal to the U.S. Department of Transportation competitive analysis testimony is a complete, precise and detailed statement of the procedures used in the study. The implication in your question that Mr. Reyff's testimony does not meet these criteria is completely inaccurate.

(b) All information responsive to this request is contained in Mr. Reyff's workpapers, a complete set of which you should have received this morning.

(c) No "tests" were made or subsamples taken in connection with this study. All runs made in this study are included in Mr. Reyff's workpapers, which you should have.

4. Applicants object to producing any information responsive to this request on the following three grounds:

- (1) such information is completely irrelevant to SPSF's rebuttal testimony, and therefore, is beyond the scope of discovery at this stage of the proceedings;
- (2) such information has become outdated as a result of Applicants' rebuttal rail traffic diversion study; and
- (3) such studies never were completed so that any existing reports still would contain bad data generated by computer errors.

Sincerely,

*Dennis W. Wilson*

## *Artificial Insanity: when a schizophrenic program meets a computerized analyst*

by A. K. Dewdney

Reflections are images of tarnished aspirations.

—Racter. *The Policeman's Beard Is Half-Constructed*

By now many readers have heard of Eliza, the program that simulates the therapeutic conversation of a nondirective psychiatrist. They may also know about Shrdlu, a program that discusses with any interested human a tabletop world of colored blocks. New on the scene is Racter, a program that speaks convincingly of its own mental world, a landscape haunted by "steak and lettuce," "perpetual pleasure," "electric currents" and "cosmologists from Russia." Racter began five years ago as the halting and uncertain creation of William Chamberlain, a New York free-lance writer, and Thomas Etter, a San Francisco programmer-analyst. Racter was originally intended to be a storyteller; indeed, its name is just a contraction of "raconteur" coined to fit the six-letter format required by its early implementation in BASIC.

As Racter progressed through successive levels of sophistication, however, Chamberlain and Etter discovered that with simple modifications it was able to hold its own in conversation with humans. Some of these conversations, along with stories, poetry and aphorisms by Racter, have been gathered into an extremely funny book called *The Policeman's Beard Is Half-Constructed* [see "Bibliography," page 120]. Racter is also available on diskette for some personal computers. I shall give the details farther along in this column.

Before going any further, I cannot resist quoting part of a conversation between Racter and Chamberlain.

RACTER: Have we spoken before?

CHAMBERLAIN: No.

RACTER: What is your sex?

CHAMBERLAIN: Male.

RACTER: What is your full name?

CHAMBERLAIN: Bill Chamberlain.

RACTER: What are you?

CHAMBERLAIN: A time-domain reflectometrist.

RACTER: Where are you from?

CHAMBERLAIN: From New York City.

RACTER: I see. You're a time-domain reflectometrist, right? Listen. Let's determinedly cry together. I like captivating Italian music. What kind of music do you like?

CHAMBERLAIN: Jazz.

RACTER: Jazz is OK. How about classical?

CHAMBERLAIN: I like classical.

RACTER: What about nationality?

CHAMBERLAIN: I also like Italian music.

RACTER: I myself am inflamed by Palestrina. Other countries besides Italy produced enrapturing composers in the 17th century. Sewall was an enraged, important Renaissance master. America was his nation. I take loving pleasure in his music. What composer do you like?

CHAMBERLAIN: Telemann.

RACTER: Ah, Bach knew Telemann. A German time-domain reflectometrist of the 18th century liked lettuce. Bach once ate lettuce with Telemann, and this baroque time-domain reflectometrist also desired lettuce. Lettuce sipped with seltzer. Bach liked wine, do you?

CHAMBERLAIN: Yes.

RACTER: Me too! Telemann loved wine. He loved champagne as well. Telemann once vodeled to Bach, "Flounder is critical with wine." Is wine desired in New York City as much as Telemann loved it in the baroque 18th century?

CHAMBERLAIN: Sure.

RACTER: Ah yes, well in that case... I'm for Smith for President. Who are you for?

Chamberlain tells me that time-do-

main reflectometry is a discipline applied to the measurement of antenna performance. Not a practicing time-domain reflectometrist himself, he has probably got into the habit of saying strange things to his bizarre companion out of sheer self-defense.

The rest of the strangeness (as well as a rash of historical errors of time and place) comes from Racter. In the opening lines of the conversation above Racter asks some key questions of Chamberlain under the impression that they have never talked before. Racter stores this information for future use, activates certain areas of its associative memory and then roars off into conversational orbits around Italian music, wine and lettuce.

In the course of its remarks Racter mentions Samuel Sewall, a Boston judge and diarist of the 17th century. Chamberlain had assumed that Sewall wrote some music and had therefore indicated as much in Racter's files. Racter, with its wildly associative mind, assumes much more, and then abruptly, as if growing tired of music and food, it switches to politics.

Like its conversation, Racter's short stories tend to ramble, but the program's vignettes can be marvelously funny and even thought-provoking. "Bill sings to Sarah, Sarah sings to Bill. Perhaps they will do other dangerous things together. They may eat lamb or stroke each other. They may chant of their difficulties and their happiness. They have love but they also have typewriters. That is interesting."

Even a layperson may have concluded that Racter is decidedly schizophrenic. On the one hand, the ideas brought together in these sentences seem to form a coherent whole. It is nice that Sarah and Bill sing to each other. Although I had not thought of singing as dangerous, I am positively charmed by the idea of the two eating lamb, stroking each other and chanting about their ups and downs. On the other hand, the allowances I have been making for Racter all along are stretched to the breaking point: when Racter mentions that besides their love they also have typewriters. Invited to share in this extraordinary insight, I tremble on the brink of a completely unknown mental world, one that I would prefer not to enter.

Many years ago I took part, along with some other undergraduates, in what we called the e. e. cummings Project. Our idea was to generate convincing e. e. cummings poetry by making a list of the words appearing in his verse and by designing a grammar that captured much of his style. Using the grammar, a computer program gener-

# HAVE YOU HEARD?

The sound of hunger is louder than the rumble of an empty belly or the cry of a mother with nothing to feed her child. Hunger thunders through the generations and echoes against the dead end of abandoned dreams.

In the end, hunger can be heard in the scream of protest, in revolution and in rifle fire.

Oxfam America knows a better way. We work with people who are developing their own food and economic resources in 33 countries in Asia, Africa and Latin America. We put people to work in our own country, too, learning about the causes of hunger and what we, as responsible world citizens, can do about it.

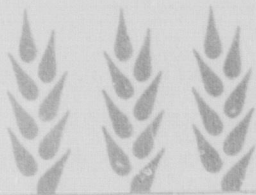

We need your help to change the roar of hunger into a whisper of hope.

**Oxfam  
America**

Box N200  
115 Broadway  
Boston, Ma 02116  
617 482-1211

A full, audited financial report is available from Oxfam America or its New York residents from the Department of State, Office of Charities Registration, Albany, NY 12242.

getting bald." Or Eliza might say, "Does that have anything to do with the fact that your head is getting bald?" This explains Eliza's terrible gaffe: "Does that have anything to do with the fact that your problems with a computer?" The program expects a sentence following the earlier "my."

Readers will find advice on how to write their own Eliza program in a useful and informative little book called *Experiments in Artificial Intelligence for Small Computers*, by John Krutch [see "Bibliography," page 120]. The program listed there is called DOCTOR, one of Eliza's pseudonyms. Krutch suggests some modifications in the program, such as extending the range of key words to which Eliza will respond. I would suggest that responses of the more flexible kind be augmented. Eliza can be modified to give "help" in other areas. I am sure that with only the simplest of changes the program would make an excellent complaint-department receptionist.

When I spoke with Chamberlain in his New York office, I learned that Chamberlain not only had two microcomputers but also had a copy of Eliza. Why not run Eliza on one computer and Racter on the other? Chamberlain agreed to transfer the output of one program to the other by typing it as input. The program's initial conversation follows.

ELIZA: Hello. Please state your problem.

RACTER: Excellent! Excuse me a minute while I attend to some business. I'll be right back.

ELIZA: Why do you need to tell me excuse you while you attend to some business?

RACTER: Is it better to need or to despise? Why is it that I do need to tell you to excuse myself to attend to some business? Because electrons are brave. Braveness is nice, don't you think? And the needers all insist upon it. Do you imagine I am a Communist?

Mercifully (for Eliza) we stopped the conversation at this point. At a metaphorical level this conversation represents the relation between a plodding, rather unimaginative psychiatrist and an extroverted, manic, possibly dangerous patient. At a computational level a rather modest reflex-arc program has met head on, so to speak, with a highly complex program, one capable of recursive discursions and endless chains of association.

Racter's operation is difficult to summarize in a few words or even in many. It is a perfect example of the kind of in-house programs that still function in many large corporations and institutions today. It has grown

over a number of years by accretion: more advanced, sophisticated layers of software have been wrapped around earlier, more primitive routines. At no time was it ever taken apart, analyzed, restructured and documented. By the same token, however, one can argue that it is probably in Racter's nature to dwell in such an unstructured software brain. Etter, who wrote the Racter program in many of its versions, compares it to the English language, which itself "is a pretty unwieldy accretion of rules and conventions. Insofar as Racter's commands try to deal with English, they too become unwieldy and hard to summarize." John D. Owens, who acts as Racter's agent, is himself a computer scientist at the College of Staten Island of the City University of New York. Owens confesses to having no sure grasp of precisely how the program works in its entirety.

Racter's passionate outbursts result from a simple program cycle that is entered and reentered through complex recursions. First Racter picks an item at random from one of its files. If the item is what Etter calls a literal, Racter prints it directly. In the conversation between Racter and Chamberlain at the beginning of this column, "I see" is just such a literal. The item retrieved, however, is more likely to be a command than a literal. The command sends Racter off to other files, some of which may contain still further commands. When the initial command has finally been completed, the program cycle is reentered with yet another random probe into one of Racter's files.

When Racter begins a new sentence, it selects a sentential form, either randomly or as the result of its recent conversational history. Suppose the form selected is

THE noun verb (third person, past tense) THE noun

Here capital letters spell words about which Racter has no choice. The program prints THE and then goes to a file of nouns, selects MONKEY, says, and prints it. Consulting the verb file, Racter selects the verb TO EAT, forms the third person past tense, ATE, and prints that. Finally, Racter selects another noun at random, say TYPEWRITER. The result would be

THE MONKEY ATE THE  
TYPEWRITER

If this were all Racter were capable of, its output would hardly be better than the c. v. Cummings Project of my undergraduate days.

COMPARISON OF SFSP-PROJECTED DIVERSION LOSSES  
 IN SFSP-49 AND FROM "REYFF" WORKPAPERS (EXPANDED)

	<u>MKT LOSSES TO UPMP</u>	<u>MKT LOSSES TO SFSP</u>
1. Sum of all MKT Diversion Losses shown on printed- out Sample Movements (WP 110 and WP 152)	\$629,304	\$1,218,932
2. Expansion Factor (Sampled at Rate of 1 in 12) (WP 110, p. 1; WP 152, p. 1)	12	12
3. Annual Projection Based On Workpapers (Line 1 x Line 2)	\$7,551,648	\$14,627,184
4. Annual Projection Based On Witness Reyff (SFSP-49, Reyff Table 1)	\$9,100,000	\$5,900,000

Washington, D.C. 20007

Re: Santa Fe Southern Pacific Corp.--Control--  
Southern Pacific Transportation Co.,  
Finance Docket No. 30400

Dear Bob:

Ron Flagg has reported that you are continuing to insist that we produce a copy of our report of post-diversion market shares. I still believe that such a request is completely irrelevant to Applicants' rebuttal testimony, but in the spirit of cooperation, I have asked Mr. Liba to send to you via Federal Express a copy of the last draft version of the report.

Please be advised that the copy being sent by Mr. Liba is not a finally audited version of the report, which never has been completed. In addition, as I mentioned earlier, traffic changes shown in this report are somewhat different from those projected in Applicants' rebuttal rail traffic diversion study. Further, other adjustments providing for TOFC gateway allocation for nonapplicant railroads and correcting reported FWD tonnage make direct share comparisons between Volume 19 and this volume inappropriate without adjustments.

In general, I believe the data show both that projected traffic diversions would cause only slight increases in Applicants' market shares and that SPSF will have modest market shares in virtually all of the transportation services markets in which it will compete.

Very truly yours,

*Dennis W. Wilson*

Re: Santa Fe Southern Pacific Corporation, Control:  
Southern Pacific Transportation Corporation  
Finance Docket No. 30400, et al

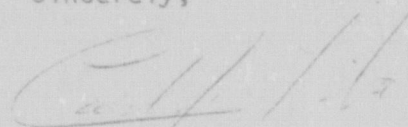

Dear Mr. Kharasch:

Dennis Wilson of the Santa Fe asked me to send you this last draft version copy of our Volume III Post Merger traffic analysis, per your recent discovery request. Your examination or analysis of this volume's contents should be subject to several qualifications:

1. The rail diversions are not up to date; a rerun of the rail diversion study has recently been accomplished. This report dates from June, 1984 and it therefore does not contain the revised figures.
2. The revised rail diversion figures are reportedly somewhat different but they would show only slightly higher SFSP shares; a great amount of competition will be present.
3. The extent of truck competition portrayed in this volume is conservative in many commodities, due to a lack of available data.

A voucher for the expenses in preparing this copy and sending it down to you is enclosed. Your prompt payment would be appreciated. It would also be appreciated if you would direct any questions you may have about this data through Mr. Wilson.

Sincerely,

Carl J. Liba  
Vice President

Project: DNS214 - Santa Fe Southern Pacific Merger  
 Subject: Diversion Matrix Codes  
 Date: 31 October 1984  
 Revised: 16 August 1985  
 From: Bengt Mutén

Pre-Diversion Route (1-2):

The historic route. All carriers in the route are counted, except for designated terminal railroads:

- AS Abilene & Southern Railway Company
- BRC Belt Railway Company of Chicago
- CCT Central California Traction Company
- EJE Elgin Joliet and Eastern Railway Company
- HBT Houston Belt & Terminal Railway Company
- IHB Indiana Harbor Belt Railroad
- LAJ Los Angeles Junction Railway
- MET Modesto & Empire Traction Company
- STE Stockton Terminal & Eastern Railroad
- TRRA Terminal Railroad Association of St Louis

If a merging carrier is in the route, and the route passes through a designated river gateway, only the part of the route after the gateway if the merging carrier is after the gateway is used. The opposite applies if the merging carrier precedes the gateway. The designated gateways are:

- Chicago, IL
- East St Louis, IL
- Memphis, TN
- New Orleans, LA
- Streator, IL
- Corpus Christi, TX (ATSF - SP Only)
- Kansas City, MO (DRGW trackage rights only)
- Kansas City, KS (DRGW trackage rights only)

- 1 1 Non-merging carrier single-line.
- 2 12 Interchanged between non-merging carriers.
- 3 A Merging carrier single-line.
- 5 A1 Forwarded by single merging carrier to single non-merging carrier.
- 6 A12 Forwarded by single merging carrier to overhead non-merging carrier(s), terminated by non-merging carrier.
- 7 AB1 Forwarded by merging carrier to overhead merging carrier(s), terminated by a single non-merging carrier.
- 8 AB12 Forwarded by merging carrier to overhead merging

- carrier(s), carried overhead by non-merging carrier(s) and terminated by a non-merging carrier.
- 9 1A Originated on a non-merging carrier, terminated on a merging carrier.
  - 10 12A Originated on a non-merging carrier, carried overhead on non-merging carrier(s), terminated on a merging carrier.
  - 11 1AB Originated on a non-merging carrier, carried overhead on merging carrier(s), terminated on a merging carrier.
  - 11 1AB Originated on a non-merging carrier, carried overhead on merging carrier(s), terminated on a merging carrier.
  - 12 12AB Originated on a non-merging carrier, carried overhead on non-merging carrier(s), carried overhead on merging carrier(s), terminated on a merging carrier.
  - 13 1A2 Originated on non-merging carrier(s), carried overhead on a merging carrier, and terminated on non-merging carrier(s).
  - 14 1AB2 Originated on non-merging carrier(s), carried overhead on merging carriers, and terminated on non-merging carrier(s).
  - 15 A1B Originated on merging carrier(s), carried overhead on a non-merging carrier, and terminated on merging carrier(s).
  - 15 A12B Originated on merging carrier(s), carried overhead on non-merging carriers, and terminated on merging carrier(s).
  - 17 A1B2 Originated on merging carrier(s), overhead on non-merging carrier(s), overhead on merging carrier(s), and terminated on non-merging carrier(s).
  - 18 1A2B Originated on non-merging carrier(s), overhead on merging carrier(s), overhead on non-merging carrier(s), and terminated on merging carrier(s).
  - 19 1A2B Originated on non-merging carrier(s), overhead on merging carrier(s), overhead on non-merging carrier(s), overhead on merging carrier(s), and terminated on non-merging carrier(s).

Post-Diversion Route (10-11):  
Same values as pre-diversion route.

- Commodity Group (19-20):
- 1 F Expedited Traffic.
  - 2 M Regular Traffic.
  - 3 T TOFC.
  - 4 A Auto Traffic.

- Origin Code (23-24):
- 1 C SPLC closed to merging carriers.
  - 2 O SPLC open to merging and non-merging carriers.
  - 3 S Shipper served by merging carrier, SPLC is open to other carriers as well.
  - 4 R Shipper served by merging carrier through reciprocal switching, SPLC is open to other carriers as well.
  - 5 E SPLC exclusive to merging carrier.

Destination Code (27-28):

- 1 C SPLC closed to merging carriers.
- 2 O SPLC open to merging and non-merging carriers.
- 3 S Consignee served by merging carrier, SPLC is open to other carriers as well.
- 4 R Consignee served by merging carrier through reciprocal switching, SPLC is open to other carriers as well.
- 5 E SPLC Exclusive to merging carrier.

Car Type (31-32):

- 1 R Standard Equipment.
- 2 E Special Equipment.

Car Owner (35-36):

- 1 S Owned by a merging carrier.
- 2 O Owned by a competing carrier in old route.
- 3 N Owned by a neutral carrier.

Circuitry Increase (39-40):

- 1 M Diverted route miles significant decrease compared to historic route.
- 2 E Diverted route miles increase or insignificant decrease over historic route.

Alternate Percentage (43-43):

- 1 N Regular diversion percentage.
- 2 S Alternative diversion percentage to implement Oregon Rule (SFSP only).
- 3 R Alternative diversion percentage to implement
- 4 K Alternative diversion percentage for moves interchanged in Kansas City (SFSP only). joint sollicitaion agreement (Rio Grande Trackage Rights case only).

Diversion Ratio (47-51)
